

CENTER VIČ Ljubljana

A modern shopping destination for families.

Situated in the heart of a residential and commercial area, CENTER VIČ in Ljubljana-Vič serves as a regional meeting place. CENTER VIČ has been firmly established among local residents for many years. Following a complete refurbishment in 2018, the shopping center in Ljubljana-Vič now boasts a modern design of the highest standard, offering shopping, dining and entertainment with 31 newly designed shops spread over 12,500 square metres. Highlights include attractive interior design, an experience zone with a fountain and a Mini Lollipop indoor playground. Six million euros were invested in the redesign of the interior of this family shopping destination, which is managed by SES. Situated directly on the A1 motorway, CENTER VIČ is easily accessible by car. Several bus routes and a network of cycle paths make the location ideal.
